

Aftermarket Parts

Mono is a leading name in the design, manufacture and supply of pumps, parts, grinders, screens and packaged solutions, worldwide. We have 8 international sites and a global distribution network, as well as over 75 years' experience in providing a range of products for the multiple application requirements of today's industries.

Mono Parts

When evaluating the purchase of a new pump, we understand the lifetime cost is of the utmost importance. The quality and fit of key components drive the reliability and durability of the pump. Our wealth of pump engineering know-how ensures our products offer optimum effectiveness and a long service life. This engineering know-how also extends into our other product offerings of Munchers, screens and packaged systems.

Mono parts are manufactured utilising superior materials, heat treatment processes and coatings for your particular application. This ensures they are:

- Dimensionally accurate
- Of the correct material specification
- Offer optimum performance for your equipment

We have a dedicated aftermarket team to help you select the correct parts when carrying out routine maintenance and in the event of an unexpected breakdown, parts can be despatched the same day. Recommended parts lists are also available to assist with budgets or stock control.

Quality Assurance

We are in a unique position to closely control the quality and integrity of our parts as we manufacture all the key components of a PC pump in-house. Mono was the first progressing cavity pump manufacturer to be certified to ISO9001 and the first to achieve the Carbon Trust Standard for its UK operations. We are also certified to ISO14001, demonstrating our commitment to improving our environmental performance.

This accreditation ensures Mono continues to improve the way we respond to customer requirements including production, purchasing, staff training and improved processes.

Service and Support

Our team of experienced application and sales engineers have a wealth of industry and product knowledge to assist you in correct product selection, problem solving and aftermarket support.

Mono products are recognised for their outstanding quality and reliability, providing years of trouble-free operation. Our service team can ensure your equipment continues to work efficiently by offering you planned maintenance contracts and repair and refurbishment of your old equipment.

Mono Universal Parts

Mono has a reputation for quality in both equipment and parts. Over recent years it has been our mission to use our extensive manufacturing and engineering expertise to expand our product offering to include high quality parts for other brands of progressing cavity (PC) pumps.

As such, Mono also manufacture and supply parts for a variety of PC pumps, all of which attract the same warranties and guarantees as parts for Mono pumps. Please see a brief selection of the ranges below. For others not listed, please contact Mono.

All of our parts are manufactured using the same machine tools, machinery and processes.

Our promise is clear one company, unlimited solutions.

Availability

Comprehensive stocks are held at Mono's head office and at our UK and international distributor locations. This offers best in class lead times, minimal downtime and eliminates the need for you to hold extensive stock.

Same day delivery is available on request to ensure minimum disruption and production stoppages.

This industry leading service combined with competitive pricing gives you a trusted and valued source when buying your spare parts.

Mono Parts and Mono Universal Parts can be purchased online via our e-commerce system. This service also allows you to check stock levels and lead times.

Please visit www.mono-orders.com to register.
